**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Huang et al., US patent 5,953,707 (from IDS)

Huang et al. shows, figure 16, a decision support system for the management of an agile supply chain.

From column 18, lines 13-15, The Demand Management Frame 130 requires the participation of two modules (intelligent agents to provide forecasts of demand): the Sales Forecasting and Planning (SFP) Module 132 and the Market Data Analysis (MDA) module 134 (historical demand data for use in forecasting).

From column 24, lines 33-64:

Forecast Reconciliation

The Demand Management Frame 130 supplies the Forecast Data 146 (bottom-up and top-down forecasts). The PSI Reconciliation Activity 170 in concert with the SFP Module 132 revises the top-down forecasts and reconciles the bottom-up and top-down forecasts. This is an iterative process, which is shown as the "S" loop (in the top right quadrant in the process flow diagram. If any changes to the bottom-up forecasts

are warranted, the PSI Planning Frame 160 interacts with the Demand Management Frame 130 to make the necessary changes.

Inventory Planning (establish base stocking levels and reorder points)

The PSI Reconciliation activity 170 (maximize efficiency) in concert with the FGIM Module 164 determines the inventory requirements in an iterative fashion. This is shown as the "I" loop (in the top left quadrant) in the process flow diagram. The inventory requirements are written to Inventory Data 182. The FGIM Module 164 as part of the PSI Planning Frame 160 also formulates the finished goods inventory policies; the policy parameters are written to Inventory Parameters 172.

Supply Requirement Planning

The PSI Reconciliation Activity 170 in concert with the APP Module 160 determines the production requirements that are consistent with the sales plan and the inventory requirements in an iterative fashion. This is shown as the "P" loop (in the bottom right quadrant) in the process flow diagram. The production requirements are written to Production Requirements Data 174. The APP Module 160 as part of the PSI Planning Frame 160 also checks aggregate production capacity and key component availability using Production Capacity Data 180 and Inventory Data 182 (component availability).

VMR (vendor managed replenishment) strategic planning is detailed in figure 23 and columns 31 and 32. It is the vendors with multiple distribution points who determine when stocks are to be replenished and in what quantity. (Per applicant's specification,

critical stocking ratio that will indicate the total quantity the distributor [vendor] can afford to hold in inventory during the forecast period.)

### ***Response to Arguments***

Applicant's arguments with respect to claims 4-9 have been considered but are moot in view of the new areas cited in the same ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
